Tamas **Dogi**

Senior Web Developer
JavaScript / TypeScript / PHP / MySQL

Summary

I am a solution-oriented front-end developer who is an expert in cutting-edge technologies and gained professional developer skills in the last few years. I started my career more than 20 years ago with PHP, MySQL, HTML/CSS. Around 10 years ago I moved my focus to the frontend and started to collect professional skills in that field. I am always trying to keep my knowledge up-to-date and learn the newest trends, technologies. Creating CLEAN code and pixel-perfect design is my passion. I really enjoy having a positive impact on the figures of the company that I work for and I like to improve them every day.

Experience

Trotec GmbH *Senior Frontend Developer* September 2024 - Present (1 year 2 months) Berlin, Germany
Working with Magento 2 and the popular Hyva theme, focusing on the React checkout. As a Senior Frontend developer also working with template files with AlpineJS and TailwindCSS. Maintenance and new feature creation is also part of my responsibility. I am also working on the new re-launch project based on Adobe Commerce.

Automation24 4 years 4 months *Senior Frontend Developer* March 2021 - April 2024 (3 years 2 months) Berlin, Germany
I worked on a custom eCommerce platform to maintain and improve the legacy code. I had only access to the frontend codebase with some limitations, so it was quite challenging working with the system. After two months of optimization and development I could achieve a 38% increase on the page speed.

After this project I was working on our R&D project that was about to find the best frontend framework for our new eCommerce website. I have done some research and also development with the following systems: - MedusaJS - Salior - Adobe Commerce - Vue Storefront At the end of this POC project, we make a meaningful decision about the best frontend framework that we could use. Once we have completed the R&D project, I have got a new task, supporting the transition of our designer to become a junior frontend developer. Then in 2023 I started to work on our new ERP system which is written in React. I am using Redux for the state management, Tailwind for the styling, TypeScript and Material design. This development is still in progress, but we are going to finish the development in a few weeks. My experience and skills had a huge

impact on the result of the development, because our efficiency has improved by almost 20 percent.

Visaya *Senior Full Stack Developer* January 2020 - March 2021 (1 year 3 months) Berlin Area, Germany
I worked on a complex project which was built on VueJS, Nuxt, Magento 2 and we were using Elasticsearch and also Phoenix framework (elixir). We built a headless eCommerce platform based on Magento 2 and VueJs. My main responsibility was the shop front end. I implemented the shop features and used the API that was provided by Magento 2. I had a big visible impact on the frontend part, because I have implemented pixel perfect design and animations to improve the UX and make the site more user friendly. I also used StoryBlock to build landing pages and integrate them to the system.

Union Insurance *Freelancer Senior Fullstack Developer* May 2018 - December 2019 (1 year 8 months) Budapest
As a senior developer I was in charge of the architecture of the new internal system that was built on Angular 8. I brought Angular technology to the company and made a big impact on the technology stack. Page 2 of 7 Occasionally working on the PHP back end side. Creating new API end points, defining database structure and building the migration files for Laravel. I have been also involved in the SSO integration project, we basically replaced our authentication logic by the SSO. I used the following technologies: - Angular 8 - RxJS 6.3 - TypeScript 3.5 - PrimeNG 6 - Twitter Bootstrap 4

Voodoo Park Ltd *Web Developer* July 2017 - April 2018 (10 months) London, United Kingdom
My responsibility was to maintain and develop the client's website which is based on Drupal 8. Creating new features and redesigning the entire site.
Skills:
- Object-Oriented Programming (OOP)
- HTML5
- Front-end Coding
- Back-End

Atelier Technology April 2017 - June 2017 (3 months) London, United Kingdom
Full stack web development, Angular.js and OpenCart backend.

HUMANOO *Front End Developer* April 2016 - September 2016 (6 months)
Development of a web app and also a company website. I worked with HTML5, CSS3, JQuery, Twitter Bootstrap and Angular2.js. I was responsible for the visual appearance of the app/site and the user experience on different devices and browsers. Page 3 of 7 Freelancer Freelancer developer August 2015 - April 2016 (9 months) I have built websites with CMS, implemented re-designs, built many micro-sites and Facebook apps. I used Angular.js, Twitter Bootstrap, HTML5, CSS3, SASS, LESS, Node.js, gulp, GIT on a daily basis.

Companisto *Frontend Web Developer* at Companisto March 2015 - July 2015 (5 months) Berlin Area, Germany Front End development. I have built several bootstrap pages for the new design. I have built these pages by PSD. I used a custom PHP framework, Twitter Bootstrap and some other js libraries.

CoPartner Enadco *Front End Developer* July 2014 - March 2015 (9 months) Berlin Area, Germany
Mainly Front End development based on Laravel and Angular. I have built some features for the Front End, like an internal mail system based on IMAP service. I used vagrant boxes.
